Comment:

ALL contaminated waste should be removed from the West Lake Landfill Superfund Site. We do not want just 70 % removed and leave 30% . The people have been very patient with this issue and now is the time to remove all the contaminated waste. It should never have been allowed to be placed in the area. The lives of all people who live in the area are important and valued. Put yourself in their shoes and ask would you want your loved ones be affected by this contaminated waste. We all know the right answer and the right decision to make at this time in our lives.
